

Assignment 3

In this assignment, you will need to create 3 web pages.

- 1) In the first page you will need to create a list of the topics we have covered in this course. You can use the list of chapters (13 chapters in total) on the course web page as a template to create this list, and it's an ordered list. Then under each list item (chapter) you need to create an unordered list with at least three items – they can be concepts, terms, or elements, which you think are the most important.

Please note that purpose of creating such list is not just to merely finish your assignment, but lead you to start going over the course materials and prepare for the final exam.

- 2) In the second page you will need to create a table exactly like the one below

Race Results			
	Runner	Time	Origin
Men	1. Peter Teagan	2:12:34	San Antonio, Texas
	2. Kyle Wills	2:13:05	Billings, Montana
	3. Jason Wu	2:14:28	Cutler, Colorado
Women	1. Laura Blake	2:28:21	Park City, Colorado
	2. Kathy Lasker	2:30:11	Chicago, Illinois
	3. Lisa Peterson	2:31:14	Seattle, Washington

The table must use 90% of the width of the web browse window and stay in the middle horizontally. Vertically it must use up the entire height of the browse window. The color background must be reasonably close enough to the one used above. The background pattern file can be downloaded from <http://www.acs.uwinnipeg.ca/jdeng/1809bg.gif>. Don't forget the proper alignment of the data either.

- 3) In the third page you will need to create an online registration exactly like this one:

The form is 500 pixel wide. Please make sure all the space measurement is proportional to the above example – at least reasonably close enough. There are three options for the drop-down menu: VISA, MASTERCARD, and Debit. You can copy whatever text content for the disclaimer part – it doesn't has to be meaningful at all, just fill in the space to make it wrap around the form.

Use one external CSS file to style all these three html pages.

Preview the web pages in a web browser and make sure they look right.

Put all your html files, CSS files and any other files in a folder and create a .zip file for this folder. Email this zip file to 1809-003@acs.uwinnipeg.ca by 11:59pm April 6, 2020. The subject line of your email must be like this: <your name><your student #>< course # with section #>Assignment 3. *Please remember that some marks will be deducted if your assignment, including the way it is submitted, doesn't meet all the requirements put down on this assignment page.*
