

You are expected to test your implementation of Undo/Redo with the Remote Loader available on the course web page.

Your implementation is expected to work for any scenario involving the Ceiling Fan and its commands. The Teaching Assistant will use the sample Remote Loader to help assess your code. Other scenarios may be used by the Teaching Assistant.

The sample loader uses commands for the ceiling fan, and performs a number of undo's and redo's.

The anticipated output is :

```
4 on buttons
Living Room ceiling fan is on medium
Living Room ceiling fan is on low
Living Room ceiling fan is on high
Living Room ceiling fan is on medium
undo command
Living Room ceiling fan is on high
redo command
Living Room ceiling fan is on medium
undo 4 commands
Living Room ceiling fan is on high
Living Room ceiling fan is on low
Living Room ceiling fan is on medium
Living Room ceiling fan is off
redo 4 commands
Living Room ceiling fan is on medium
Living Room ceiling fan is on low
Living Room ceiling fan is on high
Living Room ceiling fan is on medium
```

If you do not see that the above is the expected output, you may want to contact the instructor
